Thanks, Suzanne. Thanks for info. ORD is ready to help with lab capacity and technical advice. We have compiled the help ORD is ready to offer. Eric Koglin if NHSRC is leading this coordination with me. ORD also has presence at the HQ EOC in DC. Thus far, we have not been asked to run samples.

Great to have you there closer to the scene. Keep in touch.

Dear Andrew and Ed

Below is the reply to Region 8 - where I am temporarily located. Although requests concerning Gold King are coordinated through NHSRP I will gladly help in any way, especially since I'm here in Denver.

Best regards
Suzanne

Hi Colleen,

Just left you a voice message. As I stated on the message, Suzanne Van Drunick is currently in Denver; perhaps you could meet with her to talk about more specifics.

ORD Cincinnati certainly has the capacity to help with sample analysis, however, any requests for sample analyses would need to go through management (Lab Director is Cynthia Sonich Mullin for the National Risk Management Research Laboratory (NRMRL)). Historically, the Cincinnati labs have focused on metals, organics, and microbial contaminants in drinking, source, and waste waters.

Concerning water treatment, the following researchers have extensive experience with treatment technologies:

Tom Speth (Water Supply and Water Resources Division (WSWRD)-NRMRL)

Darren Lytle (Branch Chief-Treatment Technology Evaluation Branch-WSWRD-NRMRL)

There are numerous excellent researchers in Darren and Tom's Division who might be willing to help with treatment issues.

I hope this helps and please do not hesitate to call.

Chris

Wendy, Dwight and Chris, please see the request below from Region 8. Tom Wall asked that I send this request to you. Please let me know if we can provide any assistance based on the request below.

Thanks

Andrew Sawyers

Thanks to you both for reaching out. I am hearing that the sampling and analysis is straining our current contract support. Can you help identify possible lab support via contract or an ORD lab? I think water analysis is still the primary need, but we will probably need sediment analysis in the next phase.

It will be helpful to have names of everyone in OW with expertise on treatment so we can consult if needed.

Thanks again.

Colleen
